Introduction

Overview

The purpose of this ADA Self-Analysis and Transition Plan is to ensure that the City of Albany pedestrian infrastructure in the public right-of-way is accessible for everyone, including people with disabilities. Federal standards for pedestrian facilities in the public right of way were proposed in 2011 and are now considered best practice. The City has made a significant and long-term commitment to improving the accessibility of pedestrian facilities in the public-right-of-way.

The City has identified and evaluated all pedestrian infrastructure in the public right-of-way including curb ramps, sidewalks, crosswalks, pedestrian signals, pedestrian accessible transit stops, as well as city-owned multi-use trails that are paved.

This document was funded by the Capital District Transportation Committee, in part through a grant from the Federal Highway Administration, U.S. Department of Transportation. It is limited to pedestrian transportation facilities in the public right of way as well as shared use paths with a transportation function, and does not include any other programs, services, or activities such as buildings, parks, playgrounds, recreational trails, websites, or meeting locations. The views and opinions expressed herein do not necessarily state or reflect those of the U. S. Department of Transportation.

Mandate – Americans with Disabilities Act

The federal legislation, known as the Americans with Disabilities Act (ADA), enacted on July 26, 1990, provides comprehensive civil rights protections to persons with disabilities in the areas of employment, state and local government services, and access to public accommodations, transportation, and telecommunications.

Transition Plan

Title II of the ADA specifically applies to “public entities” (state and local governments) and the programs, services, and activities they deliver. Title II regulations require that each public agency develop a Transition Plan (also referred to as “Plan”) to bring any non-compliant programs, services, and activities into compliance.

The Plan shall, at a minimum:

- Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
- Describe in detail the methods that will be used to make the facilities accessible;

- Specify the schedule for taking the steps necessary to achieve compliance with Title II and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period;
- Indicate the official responsible for implementation of the plan.

Transition plans provide a method for a public entity to schedule and implement ADA required improvements to existing facilities. Before a transition plan can be developed, an inventory of the existing facilities must be developed.

Because the ADA is a civil rights law, the federal enforcement entity for the ADA is the Civil Rights Division of the US Department of Justice (DOJ). The DOJ enforces ADA through various means: establishing standards for meeting the requirements of the ADA; coordinating enforcement activities of other federal agencies; and, as necessary, taking legal action to require compliance with ADA by state and local governments.

The Access Board is a federal agency that promotes equality for people with disabilities through leadership in accessible design and the development of accessibility guidelines and standards. As a coordinating body, the scope of their recommendations and guidance includes but is not limited to public rights of way, public buildings, and medical facilities.

PROWAG

The United State Access Board established proposed guidelines to assist in the evaluation of accessibility of public facilities, the *“Proposed Guidelines for Pedestrian Facilities in the Public Right-of-Way”* as well as the *“Supplemental Notice on Shared Use Paths”*. Not yet formally adopted by the US Justice Department, the Public Rights of Way Accessibility Guidelines (PROWAG) are accepted as policy and were utilized in evaluating pedestrian facilities in the preparation of this plan.

The PROWAG provide design guidance for a wide variety of facilities in the public right of way, including curb ramps, sidewalks, street crossings, transit stops, and signage. Many of the guidelines are particularly sensitive to people who use a wheelchair or have low vision, though the guidance is intended to eliminate all access barriers for people who have a disability.

Public ROW and Jurisdiction

Defining jurisdictional boundaries or ownership of facilities within the public ROW and identifying the responsible entity is central to the successful implementation of the ADA Transition Plan. Three jurisdictional entities have been identified in preparing this plan including the City of Albany, Albany County, and the State of New York.

Although three jurisdictional entities possess rights-of-way within the City of Albany, the legal responsibility of maintaining and improving non-conforming or deficient facilities does not

necessarily fall to the owner of the right-of-way.

According to New York State Highway Law (HAY§349-c(2.2)), sidewalks may be installed by a county or the State of New York, with the permission of the local municipality. However, notwithstanding an agreement to the contrary, once installed, the local municipality is obligated to maintain those sidewalks. The following table (Table 1) identifies the entity responsible for the maintenance and improvement of pedestrian facilities within the City.

Table 1 Responsible Entity for Maintenance of Pedestrian Facilities

	Right of Way Ownership		
	City of Albany	Albany County	New York State
Facility Type	Responsible Entity for Maintenance and Improvement		
Sidewalks	City of Albany	City of Albany	City of Albany
Curb Ramps	City of Albany	City of Albany	City of Albany
Crosswalks	City of Albany	Albany County	New York State
Pedestrian Crossing Signals	City of Albany	Albany County	New York State
Multi-Use Trails	City of Albany	Albany County	New York State

Installation of Conforming Facilities during Roadway Alteration Projects

In accordance with the *Department of Justice/Department of Transportation Joint Technical Assistance on the Title II of Americans with Disabilities Act Requirements to Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing* (<https://www.ada.gov/doi-fhwa-ta.htm>) – when pedestrian walkways intersect a curb, but no curb ramp exists the entity facilitating the roadway alteration is responsible for the provision of a curb ramp. The same principle exists if an entity is undertaking a roadway alteration project that requires the removal of other pedestrian facilities, such as sidewalks. If the facility is removed it must be reinstalled and conform to the most current accessibility standards.

Identified Obstacles in the Public Right-of-Way

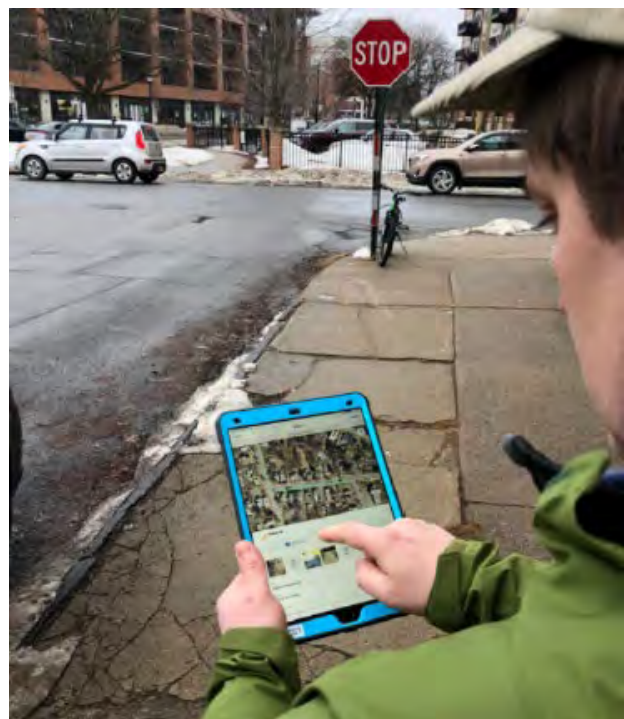

The City of Albany has conducted a detailed evaluation of obstacles within the City, County and State rights-of-way, based on criteria outlined in Appendix A.

Detailed Evaluation

Inventory

An inventory and assessment of all pedestrian facilities located in the City on local, county, and state roads was completed by consultants provided by the Capital District Transportation Committee (CDTC).

Initially, a sidewalk inventory (including related pedestrian features and transit stops) was provided by CDTC and this information was updated based on a review of the most current aerial photography and *Google Street View*. This information was used as base map for additional data collection and condition assessment. New sidewalks may have been constructed during or shortly before the completion of this document. Over time, changes to the pedestrian infrastructure should be incorporated into the inventory and monitored for continued compliance.

Field data collection was accomplished on a mobile device (a Tablet, iPad, Trimble, or mobile phone) and the ESRI applications *ArcGIS Field Maps and Survey 123*. The consultant's staff were trained in the evaluation and scoring of pedestrian features for compliance and subsequently completed the inventory and collected photographs and other important site-specific information.

Pedestrian features evaluated included sidewalks, multi-purpose trails, transit stops, and key intersection features including curb ramps, pedestrian signals, and crosswalks. Evaluation criteria focused on compliance with key elements adapted from the PROWAG. The evaluation methods are included in Appendix A.

To complete the detailed evaluation, an accessibility condition rating for each of the identified facilities was determined. The City of Albany used the following ratings and definitions to assess

the condition of each sidewalk and multi-use trail facility on local, county, and state rights-of-way.

Table 2 Characteristics of Accessibility Condition for Sidewalks and Multi-Use Trails

	Characteristics	Example
1. Fully Accessible	Designed to Meet Current Standards	Newly Installed Facility
2. Mostly Accessible	- Provides Access - Not Fully Compliant	- Curb Ramps <i>Without</i> Detectable Warnings - Limited Minor Defects
3. Partially Accessible	Limited Accessibility	Several Minor Defects
4. Not Accessible	- Significant Discontinuity - Inaccessible	- No Curb Ramps - Steps - Significant Heaving

Note: Additional information on evaluation criteria, including example imagery of sidewalk and trail conditions, can be found in Appendix A.

To evaluate the accessibility of more complex multi-part features like curb ramps, crosswalks, and transit stops a rating matrix was used. Depending on the severity and number of deficiencies at any one of these features, they were assigned a pass/fail rating.

Sidewalk and Trail Accessibility Condition

The City of Albany has a total of 282.1 miles of sidewalks and trails that have been assessed for compliance with PROWAG. Sidewalks within facilities outside of the City's control such as the SUNY University at Albany or the Harriman Campuses were not assessed as part of this plan. Sidewalks are assessed for missing panels, heaving panels, obstructions, and panel sidewalk width. Sidewalks are rated at the segment level. Typically, one sidewalk segment equates to one city block unless external circumstances – such as a driveway for a significant commercial activity like a grocery store – causes a significant break in the sidewalk on that block. Approximately one third of segments in the City are rated Fully Accessible, the most common rating. Approximately one in five segments in the City are rated Not Accessible, and approximately one third of all segments have a rating that requires repair or improvement (Partially Accessible or Not Accessible).

It should be noted that because field evaluation ratings are conducted at the segment level, short segments are less likely to have conditions that would impact their rating while the opposite is true for long blocks. This explains the inverse relationship between the Percentage of Total Miles and Percentage of Segments as accessibility ratings decline. Knowing this, the City should use this evaluation as a tool to identify segments that have barriers that must be remedied and focus remediation efforts on specific barriers rather than entire block segments.

Table 3 Block Level Sidewalk and Trail Score Results

Accessibility Rating	Percentage of Total Miles	Length (Miles)	Number of Blocks	Percentage of Segments
Fully Accessible	31.8%	89.8	1273	36.4%
Mostly Accessible	30.0%	84.5	1046	29.9%
Partially Accessible	15.9%	45.0	504	14.4%
Not Accessible	22.3%	62.8	676	19.3%
Grand Total	100%	282.1	3499	100%

The most common condition that creates barriers to accessibility are heaving panels, which were present on approximately half of all block segments assessed. The presence of a heaving panel may not result in a Not Accessible or Partially Accessible rating depending on the severity and frequency of heaving. Sidewalk segments rated Mostly Accessible should be monitored to ensure these segments remain accessible and conditions do not worsen over time.

A detailed table depicting the City's inventory of sidewalks is included in Appendix D.

Table 4 Block Level Sidewalk Barrier Characteristics

Barrier Characteristic	Number of Blocks with Barrier	Percent of All Blocks
Missing Panel	368	10.3%
Heaving Panel	1808	50.7%
Obstruction	684	19.2%
Too Narrow	555	15.6%

Curb Ramp Accessibility and Condition

All intersections where sidewalks intersect roadways were observed for the presence of curb ramps, whether the curb ramp was flush with the roadway and whether a detectable warning strip (DWS) was present. 4,574 intersection access points were evaluated to assess their condition and accessibility.

More than half of the observed curb ramps have a condition that may impact their accessibility, the most frequent of which are related to detectable warning surfaces. Detectable warning surfaces (DWS) are used to indicate to the visually impaired that they have reached an intersection with a roadway. The absence or inadequate condition of DWS was a contributing factor to accessibility barriers in over half of all curb ramps. The most common conditions identified with DWS that may impact accessibility are deterioration or damage of the DWS followed by insufficient contrast of the DWS with the sidewalk. Finally, a significant number of curb ramps are not flush with the asphalt where they meet the road, which can create problems for people with mobility issues.

Additionally, while not a requirement of PROWAG, the recommended best practice for placement of DWS is that they are perpendicular to the direction of travel to guide the visually impaired in the appropriate direction of a crossing. Approximately two thirds (63.5%) of observed DWS are not placed perpendicular to the direction of travel. It is recommended the City of Albany place DWS strips perpendicular to the direction of travel whenever possible, particularly where curb ramps serve one direction of travel.

During field evaluations it was noted that the placement of DWS strips on curb ramps at private driveways for commercial uses was inconsistent. It is recommended the City follow the PROWAG advisory recommendation for DWS at driveways (Advisory R208.1) or adopt a policy to standardize when it is appropriate for DWS to be placed at commercial driveways and/or parking lot entrances.

Table 5 Curb Ramp Conditions

Type of Barrier	Count	Percentage
No Curb Ramp Present	170	3.7%
Curb Ramps with Barriers*	2359	51.6% (of those with curb ramps)
Not Flush with Asphalt	442	10.0% (of those with curb ramps)
Inadequate Width	88	2.0% (of those with curb ramps)
DWS Absent	821	18.6% (of those with curb ramps)
DWS with Barriers*	1365	36.4% (of those with DWS)
Insufficient Width	131	3.5% (of those with DWS)
Insufficient Depth	131	3.5% (of those with DWS)
Insufficient Contrast	605	16.1% (of those with DWS)
Deterioration/Damage	1174	31.3% (of those with DWS)

**Curb ramps and DWS strips may have multiple barriers*

In addition to conditions that may create barriers to accessibility, curb ramps and DWS were inventoried for characteristics that may assist the City in determining repair costs, replacement methods, and standard practices. Most of the City's curb ramps serve one direction of travel where special consideration should be given to the placement of DWS. Nearly all the City's DWS are truncated domes on embedded DWS panels. It is recommended that the City standardize this installation type going forward.

Table 6 Curb Ramp Inventory Characteristics

Curb Ramp Characteristic	Count	Percentage of Curb Ramps
Ramp Serves One Directions of Travel	3342	75.9%
Ramp Serves Two Directions of Travel	1232	28.0%
Curb Ramp at Pedestrian Bulb Out	17	0.4%
Curb Ramps at Pedestrian Refuge Island	178	4.0%

Table 7 DWS Inventory Characteristics

DWS Inventory Characteristics	Count	Percentage of DWS
DWS Truncated Domes	3631	97%
DWS Pavement Grooves	122	3%
DWS Bolted On	203	5%
DWS Embedded	3420	91%

Pedestrian Signals

Pedestrian signals let motorists know that pedestrians have the right of way, and let pedestrians know when it is their turn to cross a roadway. These signals were evaluated for the presence of a push button to request the crossing phase and/or crossing information, the crossing signal method (audio, visual, or both), and wheelchair accessibility (height and distance of the push button from the access route). The most common condition that may create barriers for pedestrian signal accessibility is that most signals have only audio or visual cues indicating safe times to cross. 74% of the City's pedestrian signals are visual or audible only, with visual only signals being the most common type. Accessible pedestrian signals are defined in PROWAG as integrated devices that communicate information about the WALK and DON'T WALK intervals at signalized intersections in non-visual formats (i.e., audible tones and vibrotactile surfaces) to pedestrians who are blind or have low vision. It is recommended that the City adopt an Accessible Pedestrian Signal policy to guide implementation of new APS as well as upgrades of existing traffic signals with or without pedestrian signals to include APS installation.

Table 8 Pedestrian Signal Conditions

Type of Barrier	Count	Percentage
No Push Button	14	1.4% (of intersections with a signal)
Visual or Audible Only	739	74% (of signals with a push button)
Visual Only	732	73.3% (of signals with a push button)
Audible Only	7	0.7% (of signals with a push button)
Not Wheelchair Accessible	52	5.2% (of signals with a push button)

Pedestrian Crossings Accessibility and Condition

Where sidewalks exist, intersections were observed for the presence of a pedestrian access route across the roadway, the condition of the access route, and the condition of marked crossings. All roads and intersections were observed for the presence of a pedestrian access route at both ends of the crossing, the condition of the crossing, whether there is a designated crosswalk, and the condition of the crosswalk. 2,864 points were collected to evaluate the condition and accessibility of crossings. Nearly all (99.4%) have a complete access route. Poor route condition was a common barrier for crossings with a complete access route. The most condition is caused by potholes or significant cracking in the roadway where the pedestrian crossing exists. Additionally, poor condition of crossing markings was identified at nearly half of all marked crossings. While crosswalk markings are not required under PROWAG, the Manual on Uniform Traffic Control Devices (MUTCD) requires solid white lines on crossings that are marked. Marked crossings that contrast with the roadway may also provide a visual indicator of the pedestrian right of way for the visually impaired.

Table 9 Pedestrian Crossing Conditions

Type of Barrier	Count	Percentage
Incomplete Access Route	18	0.6%
Fair or Poor Route Condition	925	32.5% (of those with complete access routes)
Cracks/potholes	844	91.2% (of those with poor route condition)
Improper Cross-slope	23	2.5% (of those with poor route condition)
Other	58	6.3% (of those with poor route condition)

Note: curb cuts and crosswalks are evaluated separately. There is no relationship between the number of crossings and curb cuts evaluated due to variability of curb cut presence at crossings.

Table 10 Crosswalk Conditions

Condition	Count	Percentage
Poor Crosswalk Condition	1052	49.6% (of those with marked crossings)

Transit Stop Accessibility

The Capital District Transportation Authority (CDTA) provides transit service to the City. Four-hundred ninety-four (494) transit stops were assessed for accessibility. Transit stops within 50ft of sidewalks were assessed based on their connectivity to existing sidewalks and the conditions of their boarding and alighting area. A boarding and alighting area is defined in PROWAG as a level and stable surface for boarding vehicles. Just over one fifth (22.1%) of all boarding and alighting areas have a condition that may create barriers to accessibility. The most common conditions are insufficient depth or width of the boarding and alighting areas. Additionally, a significant number of boarding and alighting areas have a clear space for loading or unloading but have a surface material that is not reliably level or stable such as grass or dirt. It is recommended the City of Albany collaborate with CDTA to ensure accessible boarding and alighting areas at all transit stops.

Table 11 Transit Stop Conditions

Type of Barrier	Count	Percentage of all Stops
Not Connected to Sidewalk Network	17	3.4%
Boarding and Alighting Areas with Barrier*	109	22.1%
Insufficient Width	65	13.2%
Insufficient Depth	87	17.6%
Non-Accessible Surface Material**	50	10.1%
Obstructed Access Route	12	2.4%

**Note: Boarding and Alighting Areas may have multiple barriers identified*

***Note: Grass or dirt surface*

Maps of all field evaluation results are depicted in Figures 1 and 2. Full size maps are available in Appendix B.

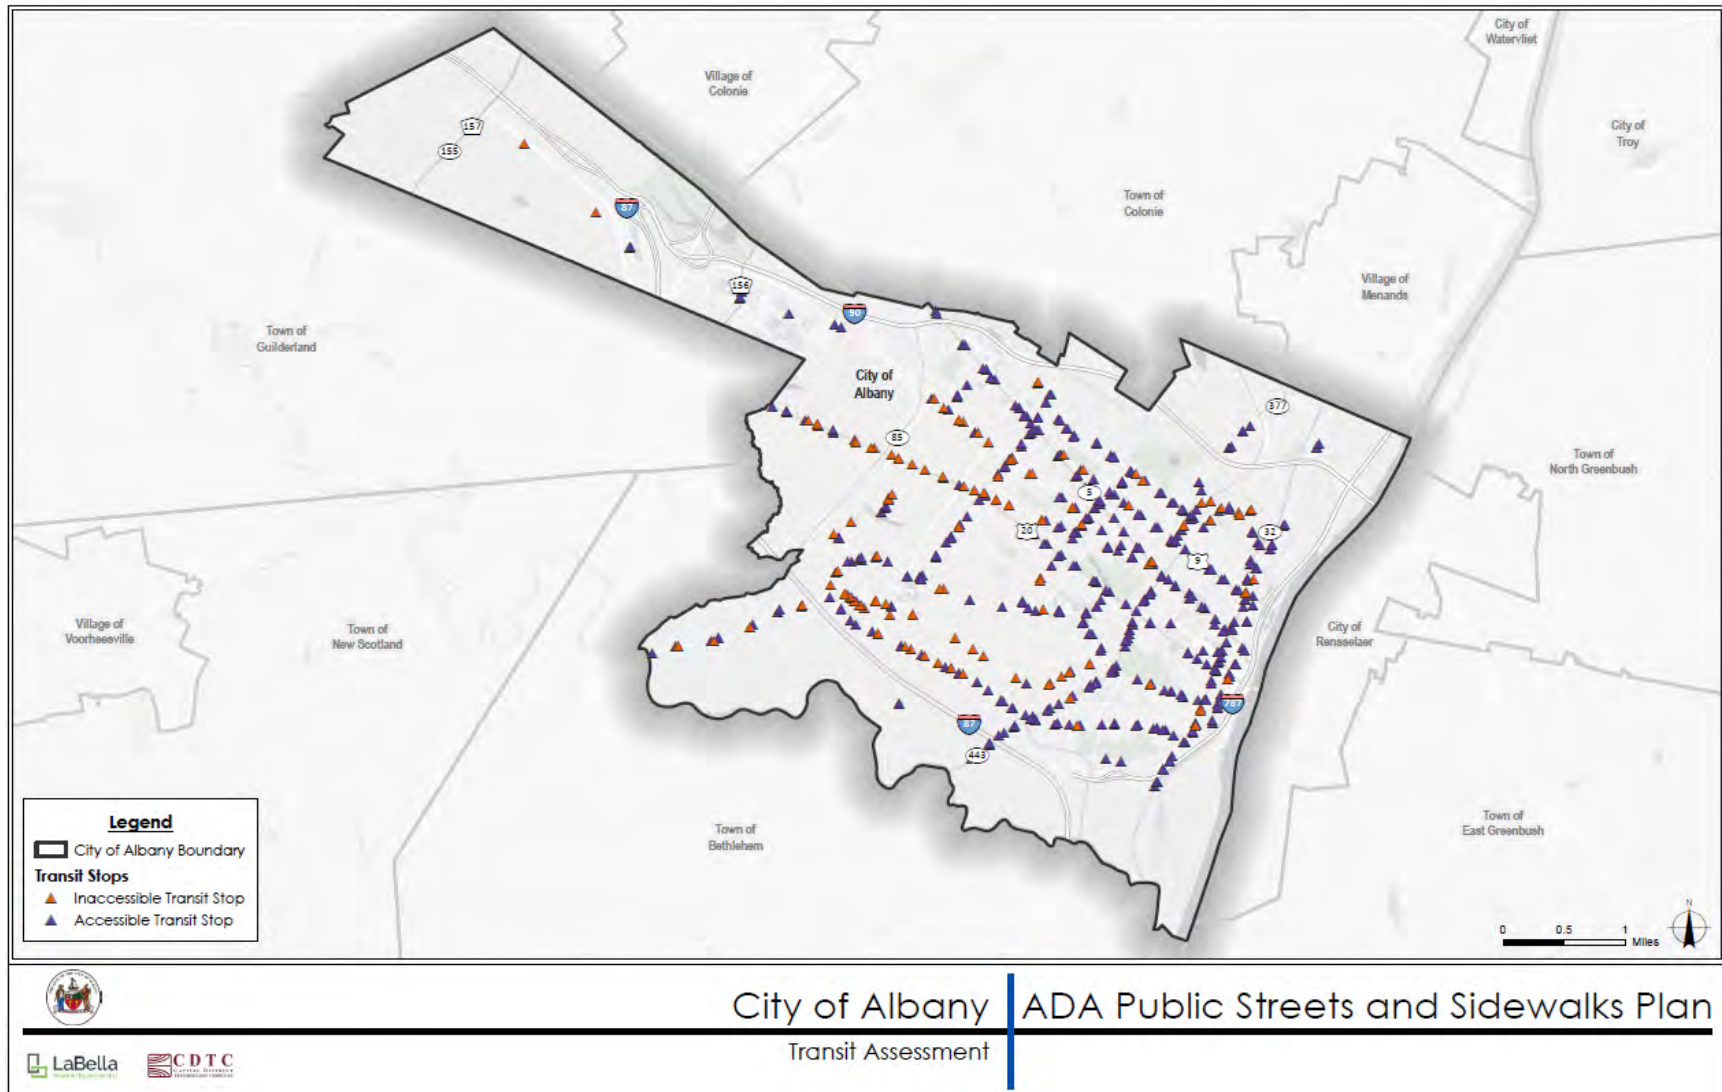

Figure 3 City of Albany ADA Crossing Assessment

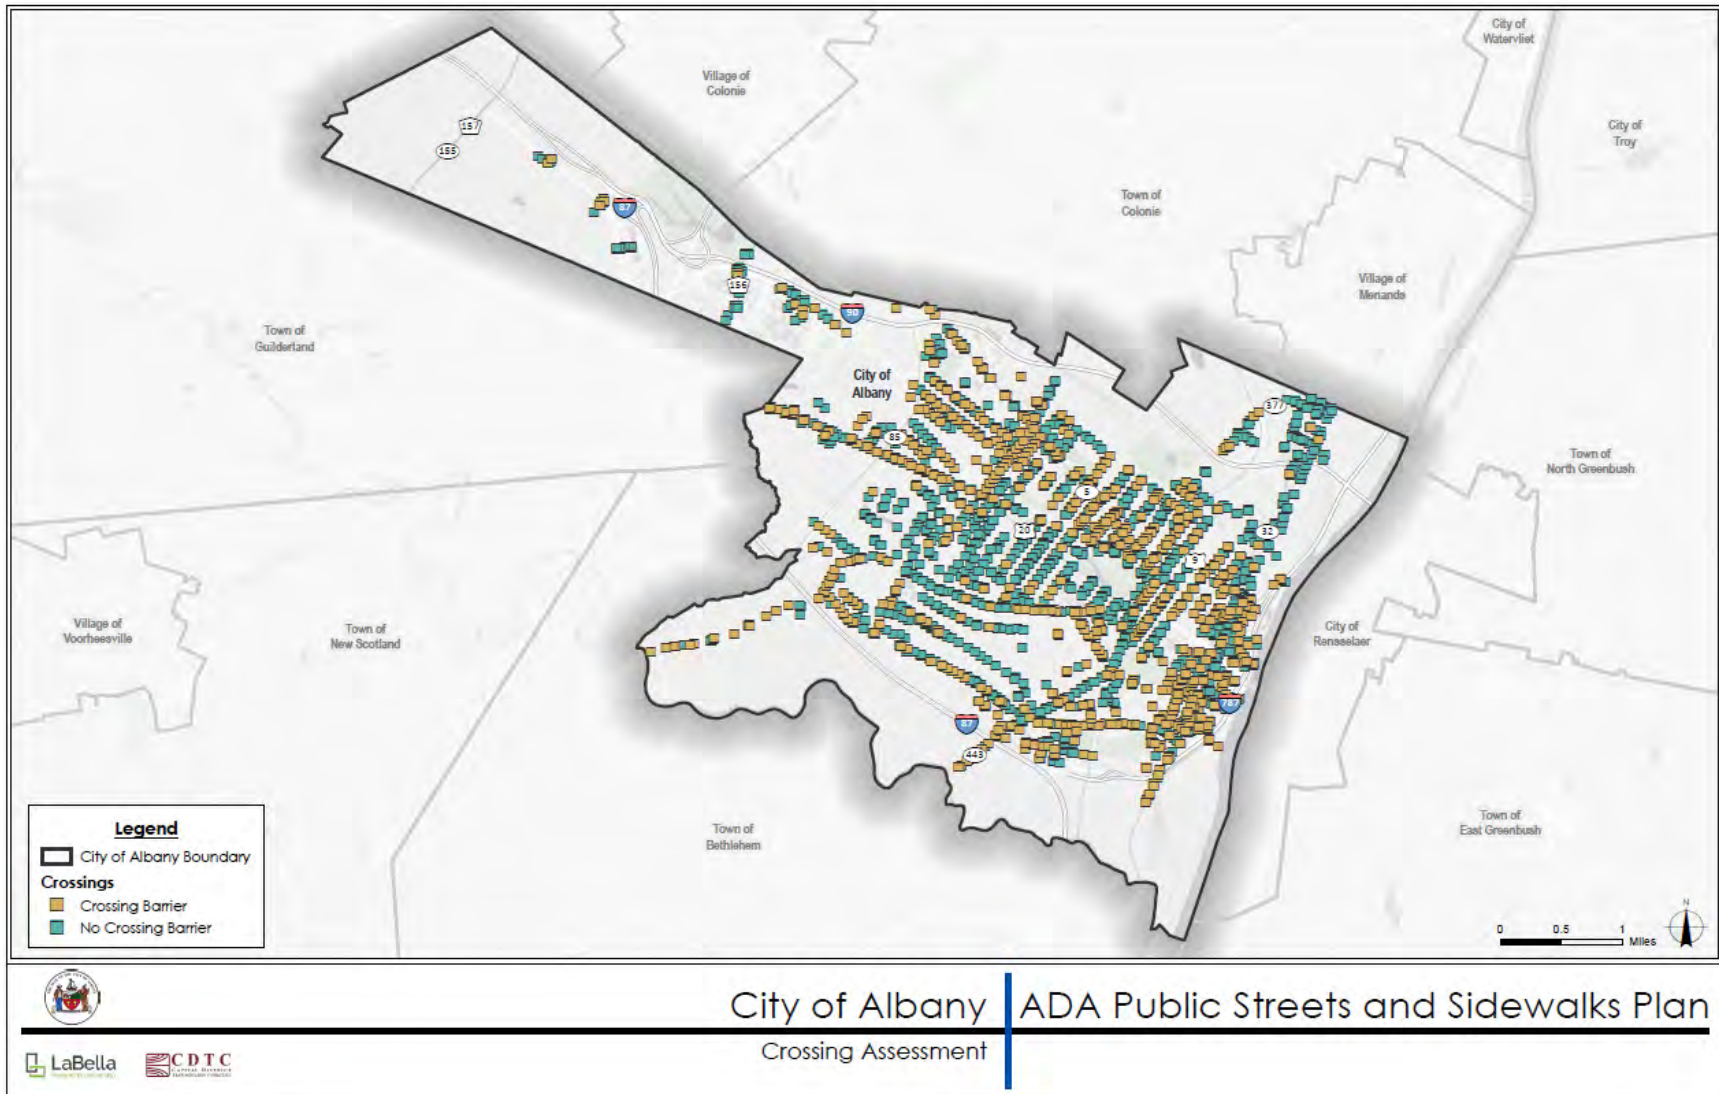

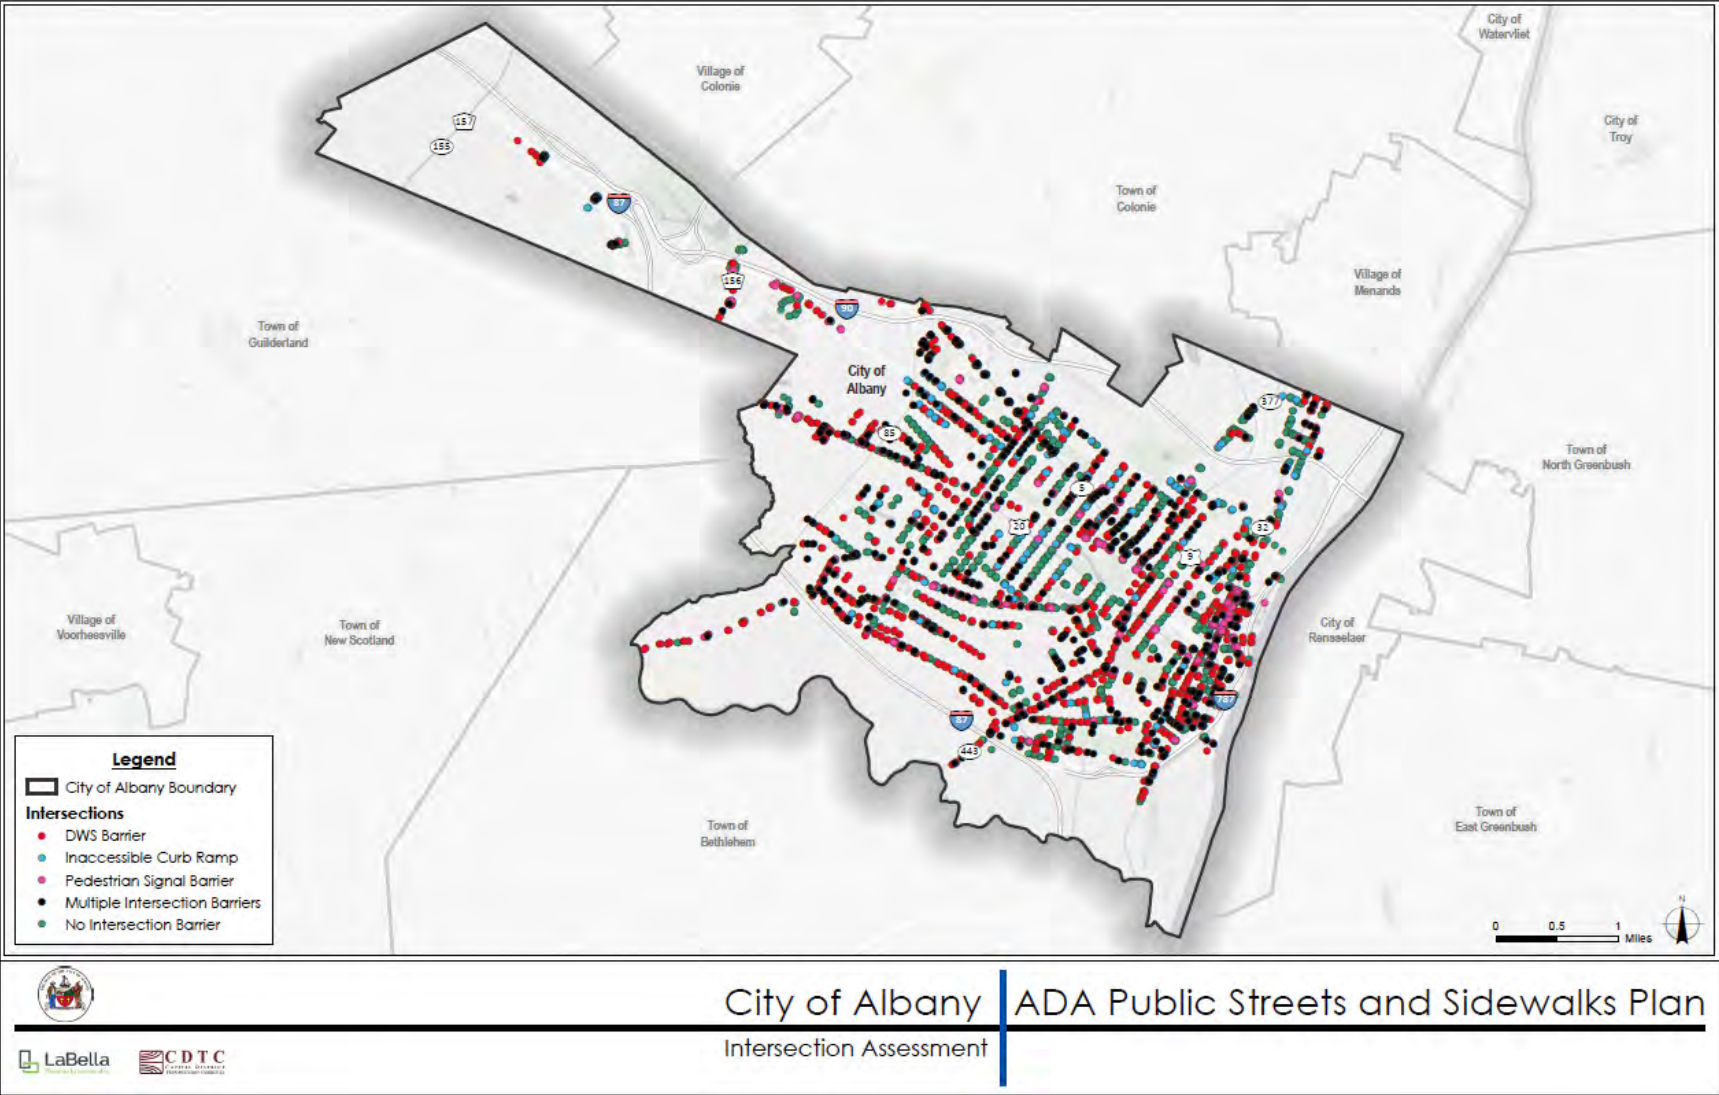

Figure 4 City of Albany ADA Intersection Assessment

Methods to Removing Barriers – Policies & Priorities

The City of Albany utilizes many different approaches to removing barriers in the public right-of-way, including proactively identifying and eliminating the barrier, responding to public complaints, and ensuring the appropriate design and build-out of new construction following the most recent design guidelines.

The City of Albany bases barrier removal priorities on two factors: location and the accessibility condition of the facility.

Location Priority

According to the ADA Title II regulations, the transition plan shall give “priority to walkways serving entities covered by the Act, including *State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas*” (§ 35.150 Existing Facilities (d)(2)). The City of Albany will also prioritize land uses that serve as destinations and drive foot traffic. Finally, to advance the City’s equity agenda additional consideration was given to historically disadvantaged communities by prioritizing facilities in areas that had been designated “Hazardous” or “Definitely Declining” in the Home Owners’ Loan Corporation’s (HOLC) historic redlining maps. Following the Title II regulations, land use and equity considerations, the City of Albany identified its location priority as follows, beginning with the highest priority:

Priority 1: Government, Education, Healthcare, & Commercial

- A. Pedestrian facilities and intersections adjacent to government buildings and institutions, educational facilities, healthcare facilities, and commercial sites within areas labelled “Hazardous” (red) in the HOLC’s historic redlining maps.
- B. Pedestrian facilities and intersections adjacent to government buildings and institutions, educational facilities, healthcare facilities, and commercial sites, within areas labelled “Definitely Declining” (yellow) in the HOLC’s historic redlining maps.
- C. Pedestrian facilities and intersections adjacent to government buildings and institutions, educational facilities, healthcare facilities, and commercial sites, in other areas.

Priority 2: Parks, Historic Sites, and Industrial Uses

- A. Pedestrian facilities and intersections adjacent to parks, historic sites, and industrial uses within areas labelled “Hazardous” (red) in the HOLC’s historic redlining maps.
- B. Pedestrian facilities and intersections adjacent to parks, historic sites, and industrial uses within areas labelled “Definitely Declining” (yellow) in the HOLC’s historic redlining maps.
- C. Pedestrian facilities and intersections adjacent to parks, historic sites, and industrial uses in other areas

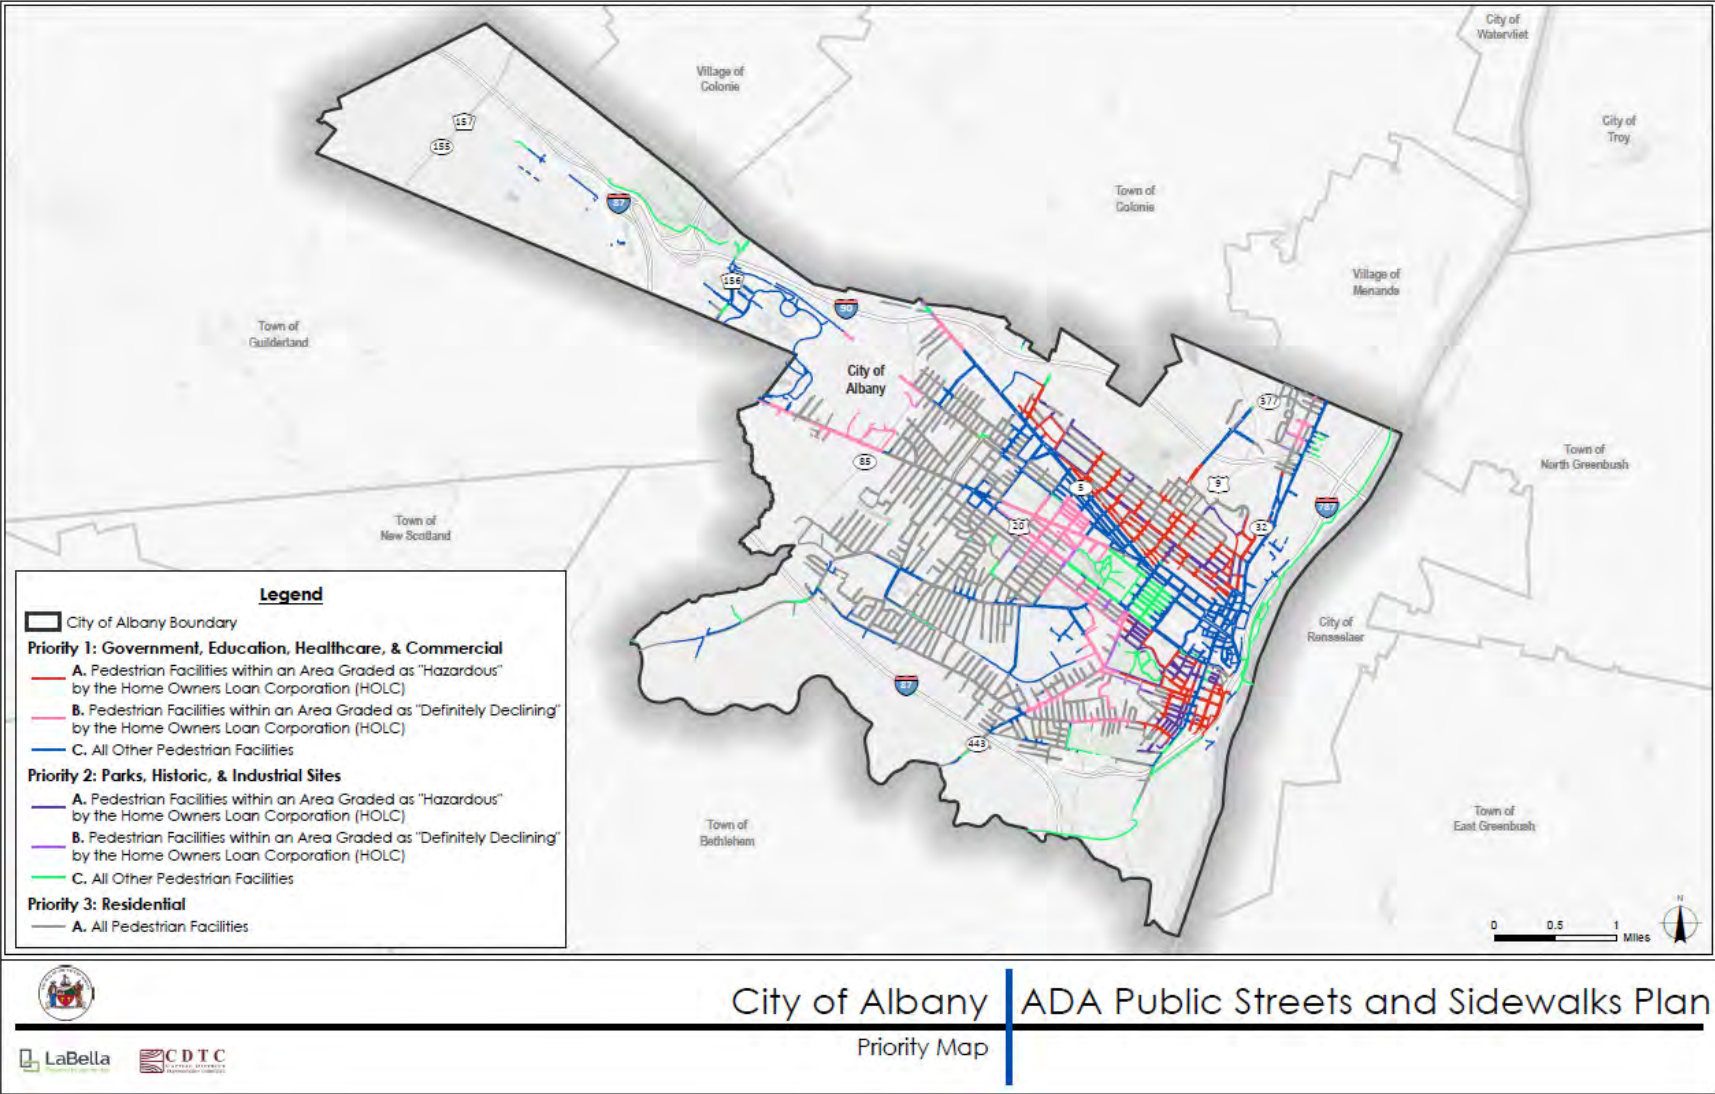

Priority 3: Residential

- A. Pedestrian facilities and intersections serving residential areas with an effort to focus attention on dense neighborhoods and areas with high foot traffic.

A prioritization map was created by combining land uses from the City's zoning maps with the HOLC's historic redlining maps to identify facilities that serve priority land uses within historically redlined neighborhoods. This map will be used to identify segments for repair and replacement where facilities in the public right of way serve the priorities identified by the City.

The map is depicted in Figure 3, using the sidewalks.

Figure 5 City of Albany ADA Prioritization Map

Public Complaint Process

The public complaint process is an integral part of this plan. Public complaints or requests may drive the prioritization of improvements. To file a complaint or a request regarding accessibility of a sidewalk or curb ramp, submit a formal grievance in writing to the Chief Diversity Officer and ADA Coordinator/EEO Office with the location, date, and description of the problem. Within 60 days after the filing of the complaint, an investigation shall be conducted and completed, including, if necessary, a meeting with the complainant to discuss the complaint and possible resolutions. No later than 60 days a determination shall be issued by the ADA Coordinator/EEO Office in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The determination will explain the position of the City of Albany and offer options for substantive resolution of the complaint.

Appendix F is a copy of the City's public Grievance Procedure under the Americans with Disabilities Act.

New Construction & Alterations

To ensure the correct design of curb ramps, sidewalks, and crosswalks in new construction and alterations, the City of Albany, through the adoption of this Transition Plan, has adopted the *2011 Proposed Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way (PROWAG)* (herein after known as ADA Guidelines) or the most current regulatory guidelines in the event PROWAG becomes outdated. These are the primary regulatory standards that govern the design and construction of all pedestrian facilities. It is important to note that in alteration projects, whenever pedestrian facilities cannot fully meet the standards outlined in the ADA Guidelines, a determination of each structural implacability or technical infeasibility must be thoroughly documented in the permanent project record.

The City of Albany's commitment to ensuring the accessibility of facilities in the public right of way is clearly demonstrated by the Work Plan (Appendix D) and schedule outlined in this report.

The City of Albany is responsible for the improvements of the facilities identified in the work plan found in Appendix D of this plan. However, as previously discussed under the *Jurisdiction* section of this report, if another jurisdiction is undertaking alterations of a roadway, including repaving, that agency is responsible for the replacement of removed pedestrian facilities or for the construction or rehabilitation of a curb ramp to the adjacent sidewalk if an accessible curb ramp does not exist.

As described in NYSDOT's current Transition Plan, NYSDOT undertakes on-going road maintenance and alterations to ensure accessibility of pedestrian facilities on State owned roads. For the purposes of this Transition Plan, areas lacking the provision of curb ramps in State owned rights-of-way will be identified in this plan as being undertaken by NYSDOT. The improvement of these facilities will correspond to the approved NYSDOT capital improvement

program.

Nothing contained in this work plan would in any way prevent the City of Albany from modifying the implementation schedule.

Schedule

The detailed evaluation of the City of Albany's sidewalk network identified a total of 107.8 miles of sidewalk segments rated Partially Accessible (45.0 miles) or Not Accessible (62.8 miles) which will require repair or replacement of barriers to bring them to compliance. The City of Albany has set a goal of bringing 5.5 miles of these segments to compliance each year, which will bring the City to compliance in approximately 20 years. As identified during the location prioritization process, pedestrian facilities in the public right of way adjacent to government, educational, healthcare, and commercial facilities will be prioritized before facilities serving other areas. Curb ramps, crossings, and pedestrian signals will be addressed with their corresponding sidewalk segments or during road paving and resurfacing projects.

As opportunity allows, the City will make efforts to collaborate with stakeholders to improve the ADA accessibility of pedestrian facilities in the public right-of-way. Compliance is required to the extent feasible within the scope of the project. There will be times when it is technically infeasible to provide full compliance with the guidelines for example, if clear space at the top of the ramp is obstructed by a building or the slope of a hill is so extreme as to prevent a reasonable slope for a ramp in both directions. The inventory process may not account for such situations and could show a high-priority rating when all practical actions have been taken.

Monitoring & Updates

Transition Plan Management

As with any effective planning document, the City of Albany's Transition Plan will require continued review and updating. It is recommended that the review and update this document on a five (5) year cycle. However, this does not preclude the City from altering that five-year cycle. If new regulations are adopted or new information is available that does not alter the intent of the transition plan, the City intends to add appendices to the document reflecting those changes.

Members of the public that wish to see changes made to the plan are encouraged to submit their comments and concerns, in writing, to the ADA Coordinator/EEO Office to consider including during the next update.

Coordination with Public Improvements and Capital Expansion

The City has identified a schedule for improvement to non-compliant facilities (Appendix D). However, the City should take advantage of regular capital improvement projects or private development to upgrade deficient facilities, if occurring adjacent to those facilities.

The City will coordinate with New York State Department of Transportation (NYSDOT) capital improvement schedule to replace or upgrade non-compliant curb ramps and sidewalks along State highways. Likewise, the City will coordinate with Albany County to replace or upgrade non-compliant curb ramps and sidewalks along County roads.

Public Input

The City of Albany provided opportunities for individuals to comment and provide input on this Transition Plan, which includes:

- Early results of the field assessment and prioritization framework were presented to the City of Albany Commission on Human Rights for feedback.
- The plan was presented to the City of Albany Common Council on October 12, 2022, and council members were encouraged to provide feedback on behalf of their constituents.
- Copies of the Plan have been made available to the public at 24 Eagle Street, Albany , NY 12207
- The ADA Transition Plan has also been made available on the City's website at <https://www.albanyny.gov/824/Disability-Access>; and
- The City of Albany opened a public comment period from January 24, 2023 to March 5, 2023. Members of the public were encouraged to provide feedback via a form on the City's website or to call/email City staff to log their comments.
- Two community engagement work sessions were held on January 24 and February 2, 2023.
- City staff conducted targeted outreach to local stakeholder organizations and individuals. These organizations include but are not limited to:
 - Albany County Strategic Alliance for Health
 - Disability Empower Consulting
 - Albany Public Library
 - United Way of the Greater Capital Region
 - City of Albany Commission on Human Rights
 - Albany School District

- Lynn Anderson – SUNY Faculty and ADA Specialist
- Disability Rights New York
- Center for Disability Rights
- Alzheimer’s Association
- St. Peter’s Hospital
- Our Ability
- Albany Housing Authority
- Walkable Albany
- Center for Disability Services
- Jewish Family Services
- Catholic Charities of the Diocese of Albany

Comments during this period included the following:

- Making sidewalks accessible for all is not only about making sure the pavement is flat and wide enough for all kinds of users, but also should include amenities like shade trees, benches, and trash cans. All three are lacking within the City of Albany and make the experience of walking unsafe and unpleasant. Thank you.
 - Thank you for your comment. While we acknowledge the benefits that street amenities provide to enhance the pedestrian experience and promote walkability, the funding and scope of this project is solely focused on compliance with the Americans with Disabilities act based on the proposed design standards in the Public Rights-of-Way Accessibility Guidelines.
- I note on the map on Page 38 of the plan that the Mount Hope Neighborhood (My. Hope Dr., Garland Ct., and Little Ln.) is completely missing, even though the color key chart includes a provision for “No sidewalk.” Also, what is meant by “Other?” Portions of Southern Blvd (Rt 9W) and Mount Hope Dr. around Mount Hope Commons and the Sunoco station to the north of it do, indeed, have sidewalks. After all, Mount Hope Dr. is on CDTA Route 107.

Thank you for your comment. Public sidewalks along S Pearl St and Mt Hope Dr have been evaluated as part of this plan. Streets where no sidewalks are present, like Garland Ct or Little Ln, have not been assessed as there are no pedestrian facilities to evaluate for compliance with the Americans with Disabilities Act. It appears new sidewalks were constructed on Route 9w near Mt Hope Dr after work on this Transition Plan began. It is expected these will be added into the inventory and monitored going forward.

The “No Sidewalk” label is used to indicate a disparity in data; on sidewalk segments labelled “No Sidewalk” the available data indicates that a sidewalk should be present, but fieldworkers did not observe a sidewalk for evaluation. These sites will require further review from the City of Albany to determine if the existing sidewalk data is inaccurate, or if a sidewalk was removed without being replaced. The “Other” label was used to identify sidewalks that had been included in the inventory, but where the sidewalks are not along a public right-of-way, or where the City of Albany is otherwise not responsible for maintenance (ex: the SUNY Albany campus). The map legend has been updated to state these facilities are “non-city-owned” facilities.

- Don't understand why the ADA transition plan only includes information about infrastructure and not information about other types of disability access such as hearing access, language access or access for neurodivergent individuals - contradicts pg. 3 that states the ADA plan "provides comprehensive civil rights protections to persons with disabilities in the areas of employment, state and local government services, and access to public accommodations, transportation, and telecommunications"
 - This document was funded by the Capital District Transportation Committee, in part through a grant from the Federal Highway Administration, U.S. Department of Transportation. As such, it is limited to pedestrian transportation facilities in the public right of way as well as shared use paths with a transportation function, and does not include any other programs, services, or activities such as buildings, parks, playgrounds, recreational trails, websites, or meeting locations.
- I served as a State level ADA Coordinator until retirement. I am happy to offer my skills.
 - Thank you for your comment.
- Thank you for drafting this transition plan. It is a document that is required by the Americans with Disabilities Act, but it is supposed to be a part of something else.

All state and local governments, their departments, and other entities within them are required to adopt transition plans by July 26, 1995. A transition plan is NOT about physical structures, features, or elements. It must identify any and all forms of discrimination in local laws, ordinances, rules, regulations, policies, services, offices, programs, activities, events, websites, announcements, and communications. It must prescribe remedies with deadlines for each one. Bear in mind that for anything that is found that is discriminatory in any way, the intent does not matter. The effect is what matters.

Governments, departments, and other entities with 50 or more employees also are required to adopt a second document called a self-evaluation of physical structures. THIS is a part of what you started with your 143-page draft that you are incorrectly calling your transition plan. You still must evaluate buildings owned and operated by Albany such as City Hall (which could use some major access improvements), 200 Henry Johnson Blvd., Bleecker Stadium, and any others.

Then you must write a REAL transition plan as the ADA mandates. It was due only 27 1/2 years ago. It costs nothing to fix bad policies. The Corporation Counsel and ADA Coordinator should schedule time together regularly to examine 400 years worth of policy and propose changes wherever necessary. There are passionate disabled advocates ready to advise you right here in this fair city. Call on us.

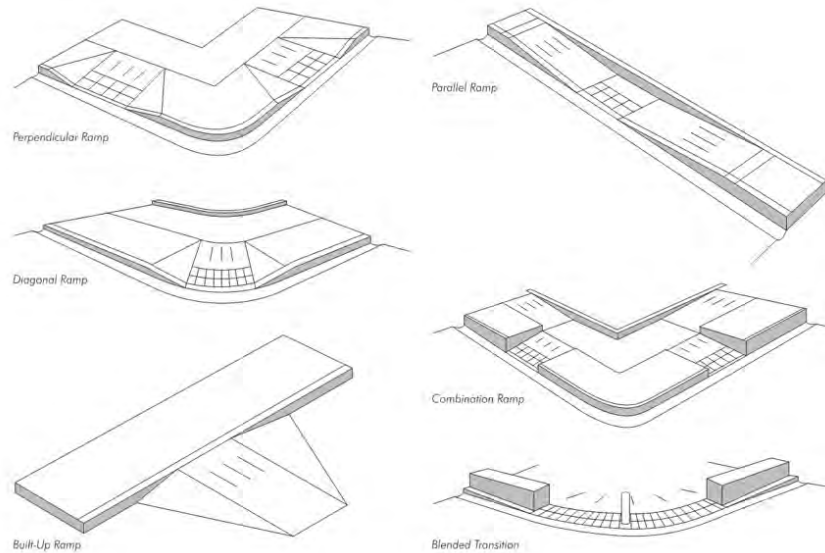

- Thank you for your comment. The funding for this plan limits the scope to pedestrian transportation facilities in the public right of way as well as shared use paths with a transportation function, and does not include any other programs, services, or activities such as buildings, parks, playgrounds, recreational trails, websites, or meeting locations. The title of this plan has been updated accordingly to reflect its focus on pedestrian transportation facilities. The City of Albany has an existing ADA Transition Plan and is committed to updating the existing plan and improving accessibility across all City facilities and services – the development of this plan is one component of that ongoing effort.

Copies of submitted public comment forms are available in Appendix H.

Appendix A: ADA Evaluation Criteria

CURB RAMP PRESENT

There are many different types of curb ramps that can be used for different intersection types

DETECTABLE WARNING SURFACE (DWS) TYPE

Truncated domes

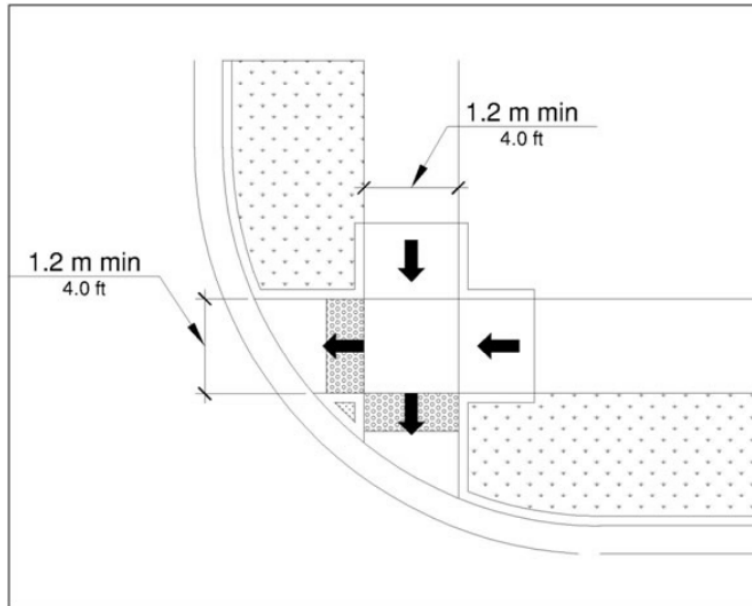

Pavement grooves

Truncated Domes: Bubble like domes appear popped out of the DWS. They should have a height of around 0.2 inches. The domes should be aligned in the direction of pedestrian travel.

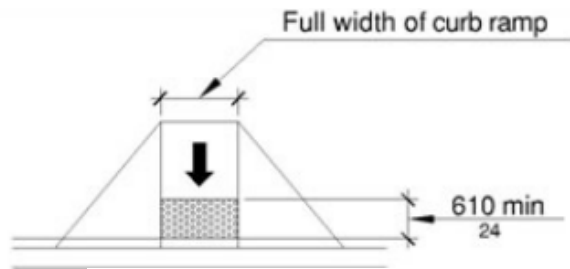

Pavement Grooves: Grooves cut into the existing concrete, not an ideal DWS. The grooves should be aligned in the direction of travel.

DETECTABLE WARNING SURFACE (DWS) PLACEMENT, WIDTH, AND DEPTH

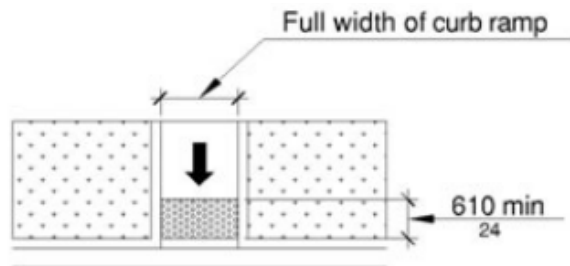

Width: The DWS should extend the full width of the curb ramp or landing space. The minimum width is 4 feet (48 inches).

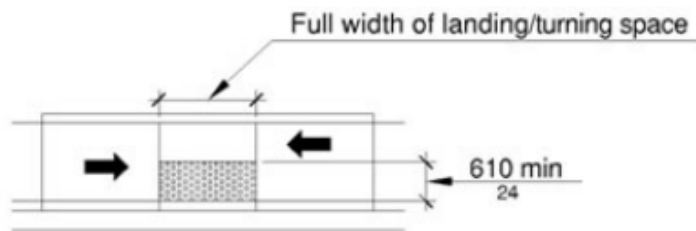

Depth: The DWS should be a minimum of 2 feet (24 inches) in depth in the direction of travel.

(a) perpendicular curb ramp with flared edges

(b) perpendicular curb ramp with returned edges

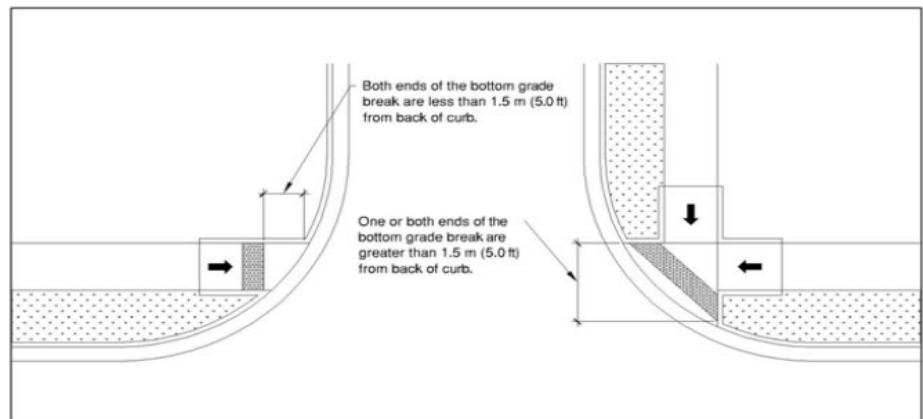

(c) parallel curb ramp

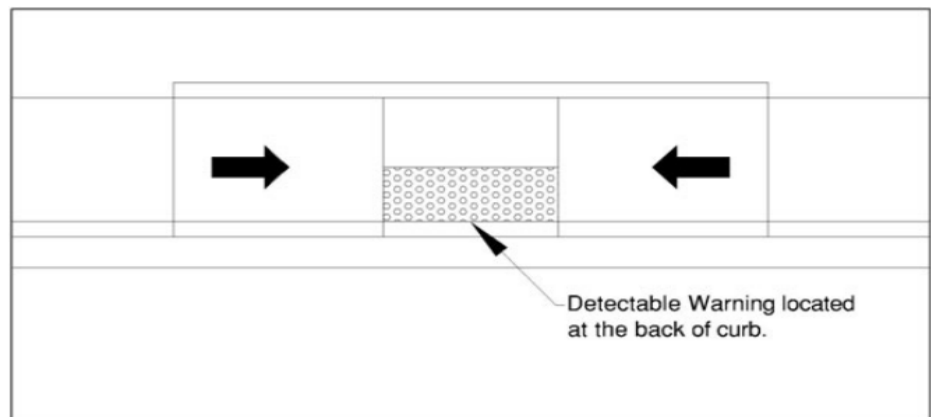

Detectable Warning Surface (DWS) Placement, Width, and Depth (cont'd)

Placement: The DWS should be aligned perpendicular to the pedestrian direction of travel. This depends on the type of curb ramp. Follow the figures below for the appropriate curb ramp.

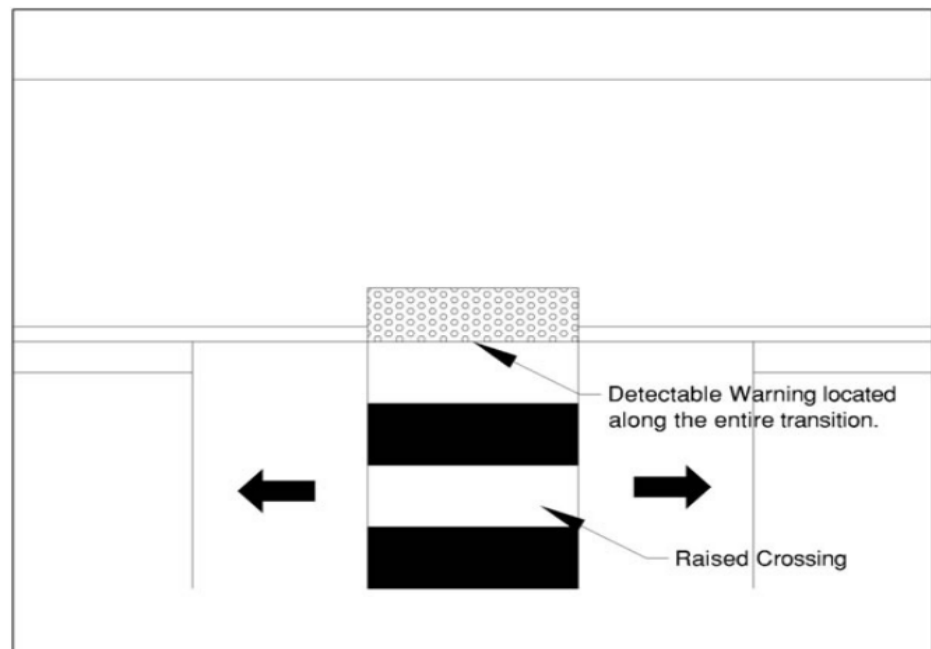

Perpendicular curb ramp

Parallel curb ramp

Blended transition

CONTRASTING DWS COLOR

DWS Color Contrasts from Curb Ramp

DWS Color Does NOT Contrast from Curb Ramp

TYPE OF PEDESTRIAN SIGNAL

Pedestrian Sign – Not pedestrian activated: A sign marked for pedestrian crossing is used. No button mechanism is used. It may or may not have a flashing feature on it.

Pedestrian Signal – Pedestrian activated: A button can be pushed by the pedestrian, it then activates a crossing. It may or may not have a flashing feature on it.

Features of the pedestrian crossing buttons:

Visual: High contrast colors are used on the sign and/or button to aid the visually impaired. Flashing lights, large/bold fonts and arrows may also be included.

Audible: Locating tones would be emitted from the signal post to guide someone to the pedestrian crossing button. Or when pressed the signal will speak, communicating to the pedestrian when it is safe to cross.

Both: When a button uses both auditory signals as well as visual cues to aid a pedestrian in crossing the street. This includes any combination of visually high contrast signage, flashing lights/signals, or audible tones/speech.

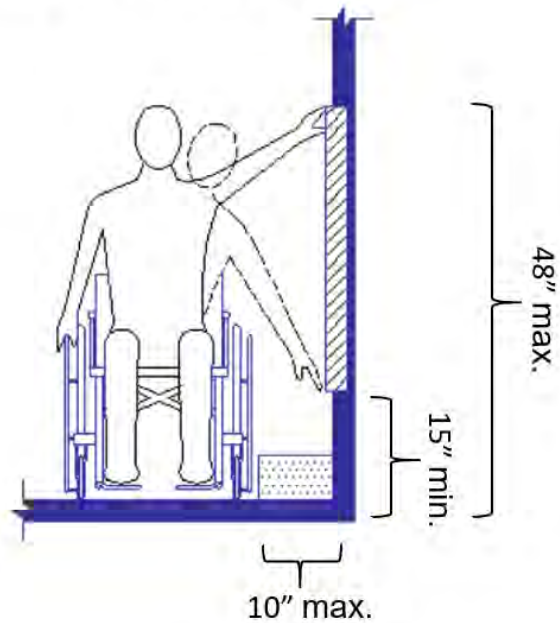

PEDESTRIAN SIGNAL COMPLIANCE

If the pedestrian signal has a button, the button should be mounted within 15 inches to 48 inches above the ground. The button should be accessible with a maximum of a 10 inches side reach.

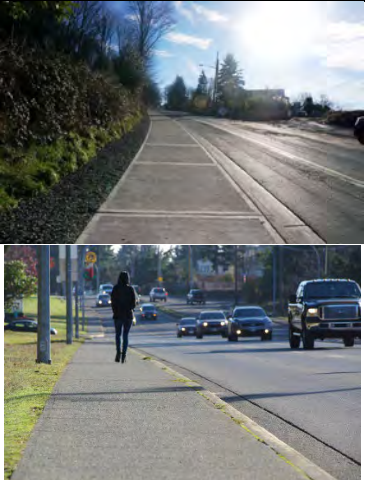

Accessible Pedestrian Pushbuttons

Reach Ranges

- ☐ 48" max. above the ground
- ☐ 15" min. above the ground
- ☐ Side reach within 10"

SIDEWALK SEGMENT RATING

Rating	Condition	Reference Images
Fully Accessible	Sidewalk is new or in like-new condition. Sidewalk is level, no cracks, no faults, no obstructions, and adequate width. Sidewalk is at least 4 feet (48") wide.	
Mostly Accessible	Sidewalk is almost in a new condition. Sidewalk should be level, and width adequate width. Sidewalk may have minor cracks.	

Partially Accessible	Sidewalk may have small vertical faults larger than ½" but could potentially be beveled/repared, large cracks, an inadequate width, small patches of spalling or another type of rough surface deterioration, and a small buildup of dirt/debris, creeping of vegetation between panels or cracks.	
Not Accessible	Sidewalk may be seriously uneven from faulting (greater than 1/2 inch) that cannot be beveled/repared and will require replacement, and inadequate width. Sidewalk may have serious accumulation of dirt/debris, establishment of vegetation or other obstructions.	

SIDEWALK DEFECTS

Missing Panels

Heaving Panels

Obstructions

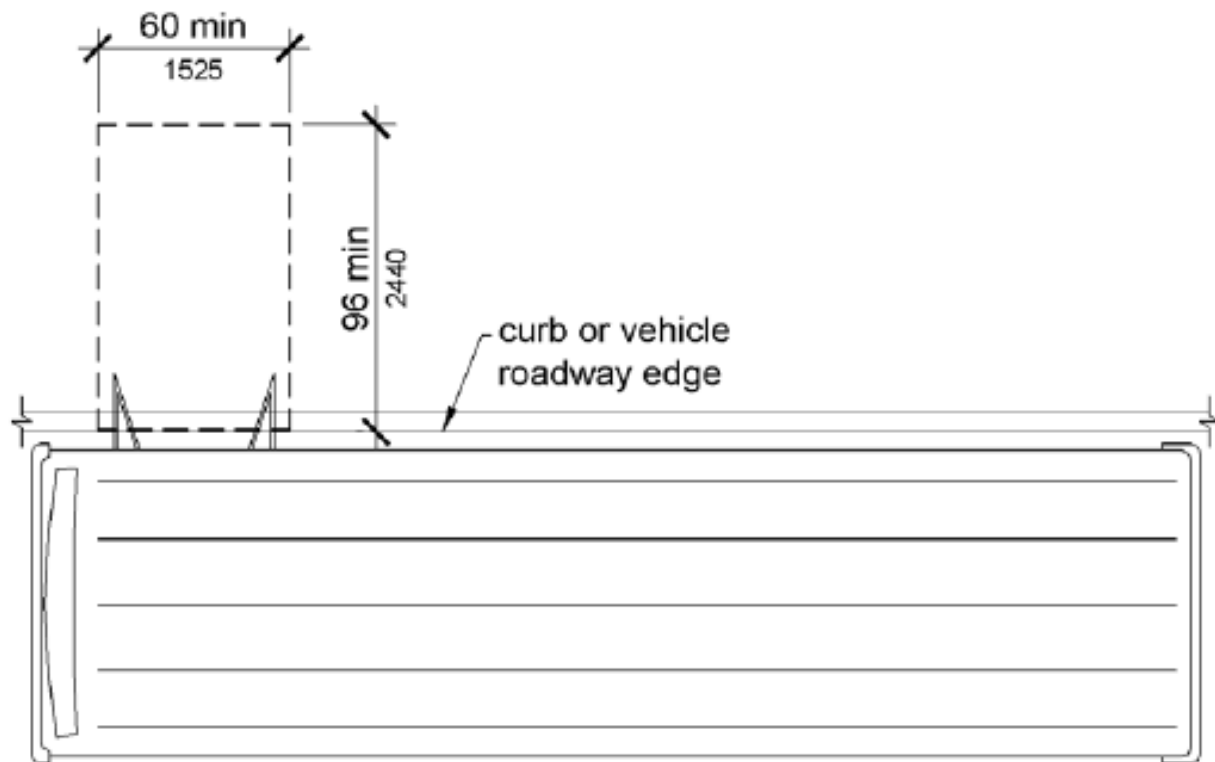

Too Narrow

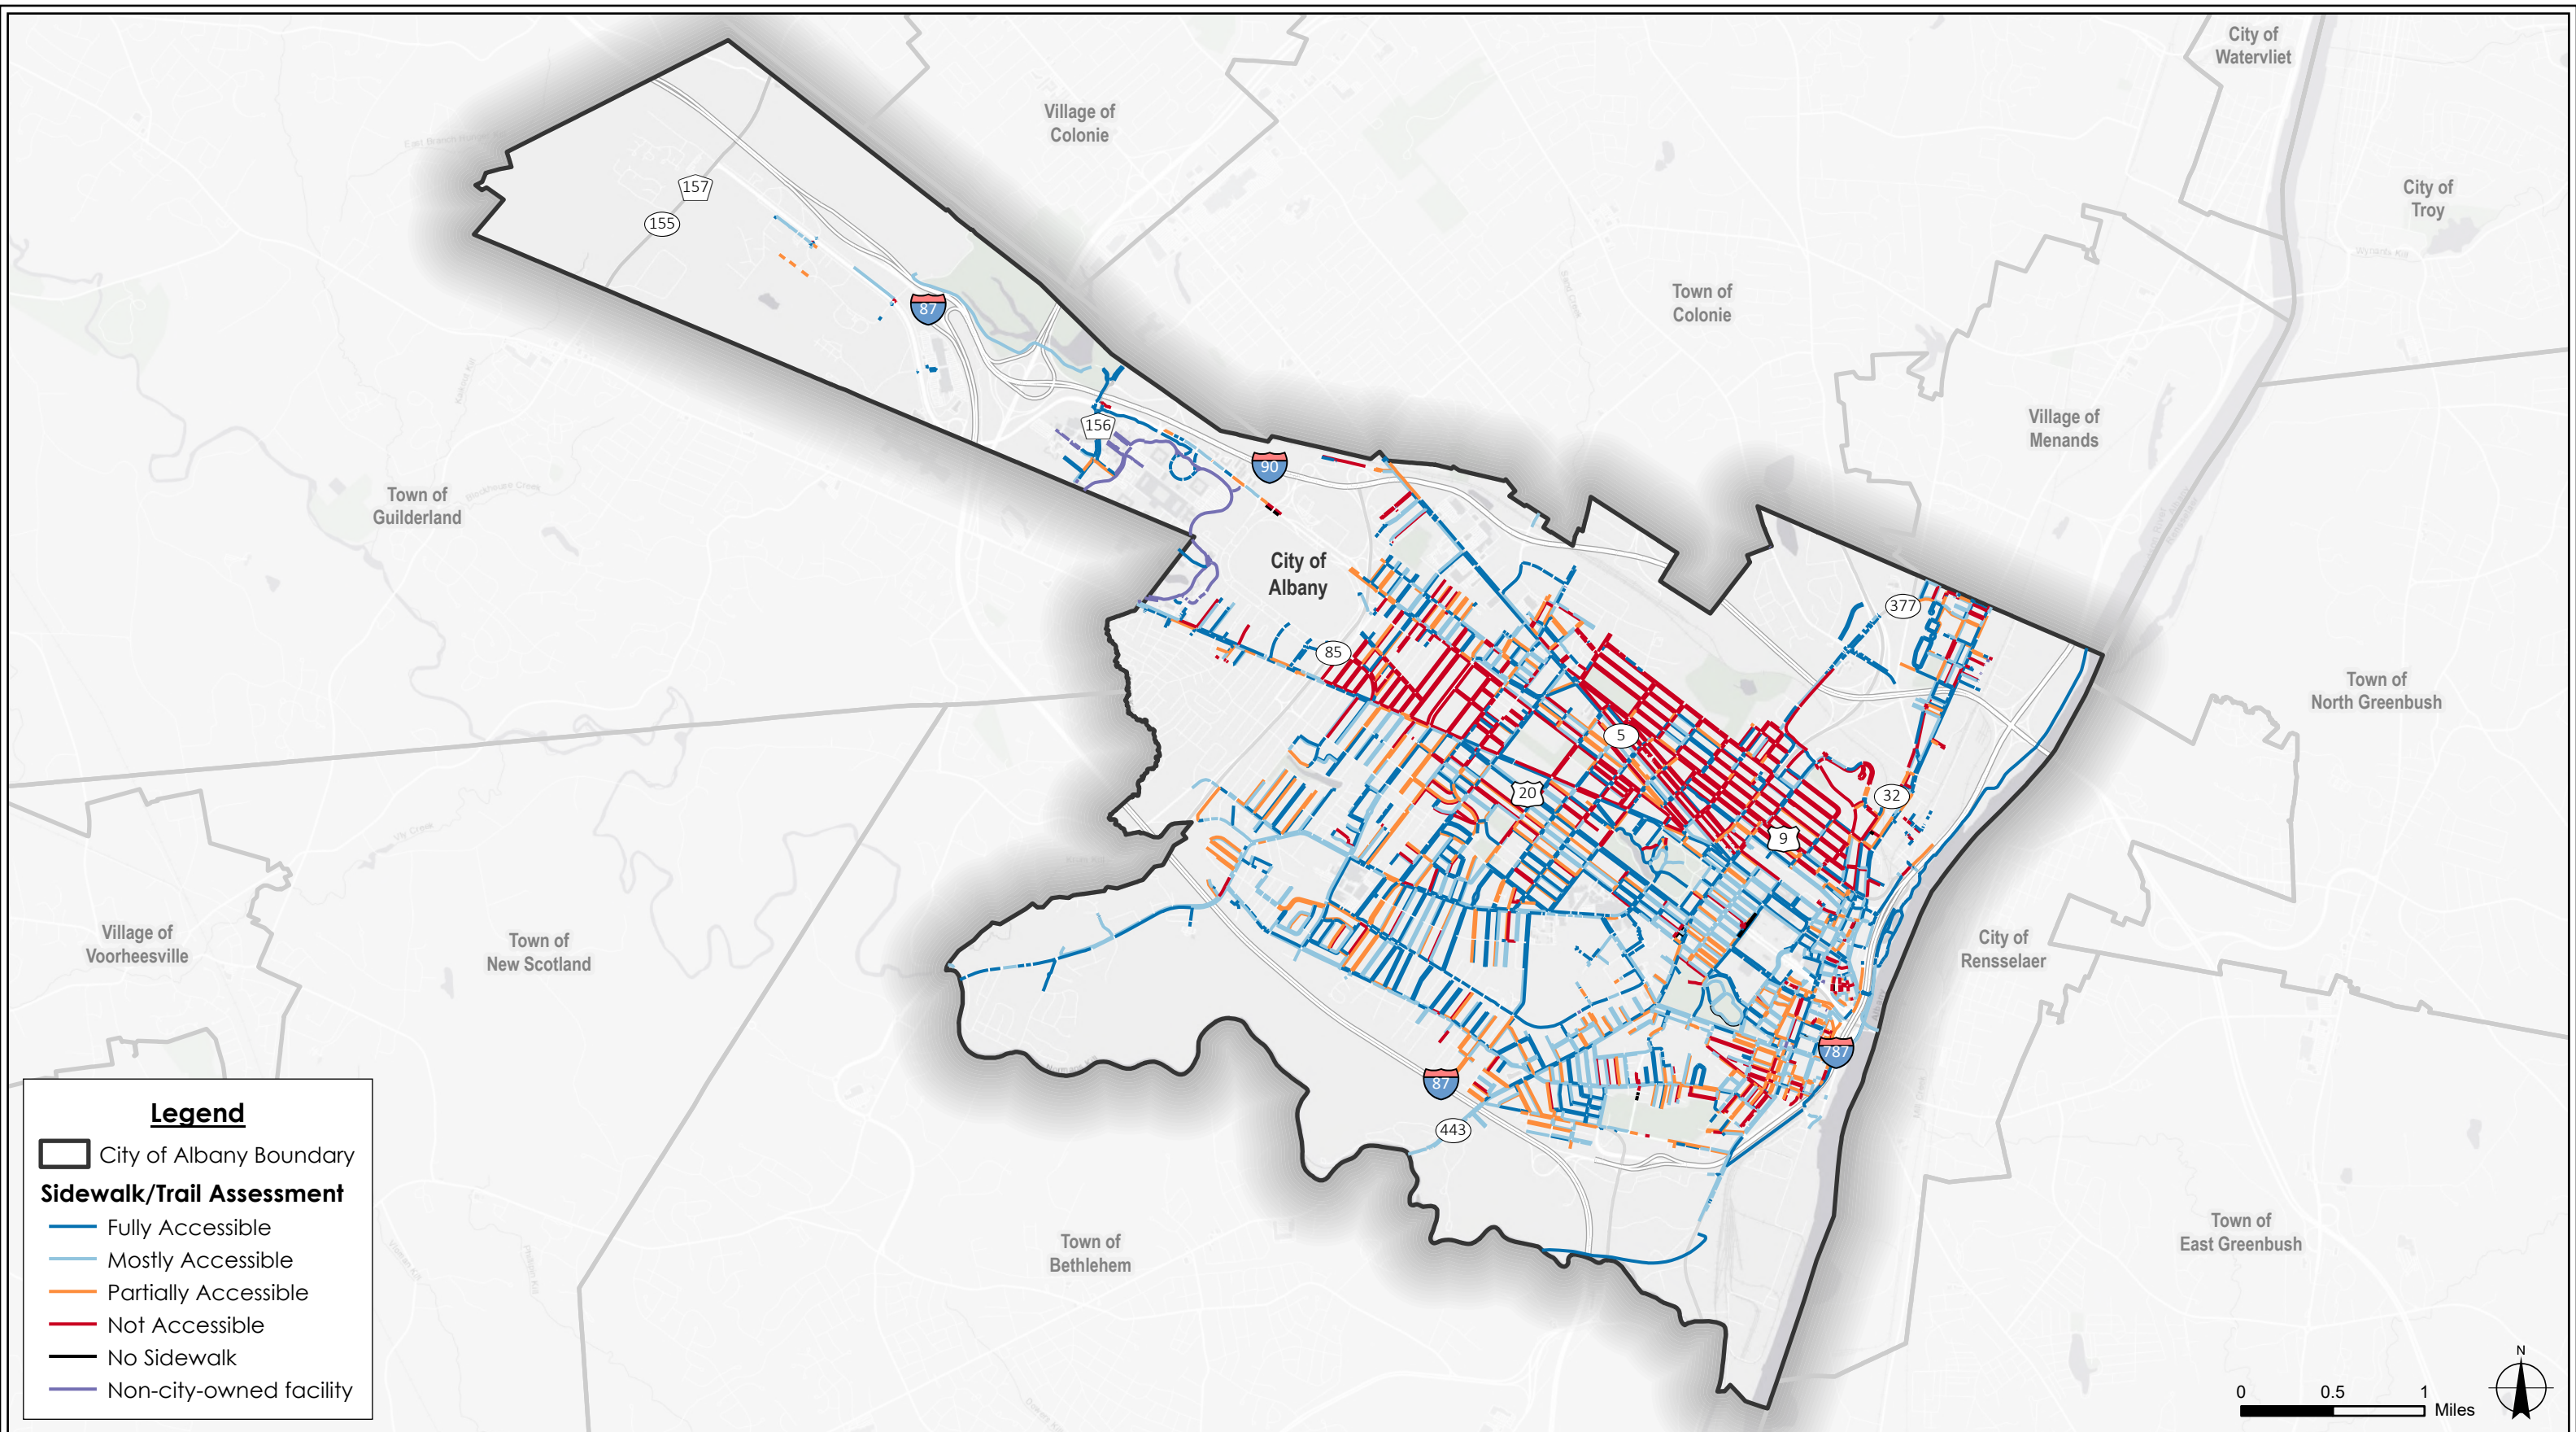

TRANSIT STOPS

Accessible transit stops require a 60" (5') wide landing area and a 96" (8') deep landing zone.

Priority Map

Appendix C: Cost Estimates

Unit cost estimates are established using replacement costs from the NYSDOT Quick Estimator Reference – Upstate with a 30% increase at the recommendation the City of Albany engineers to reflect recent increases in material costs. Unit cost estimates are used in conjunction with field data to estimate repair costs. Note that specific costs may vary due to site conditions that may require relocating utilities/mailboxes; alteration of drainage structures; driveway aprons; acquiring right-of-way; pruning/clearing & grubbing; planting.

Table 1 Unit Cost Estimates

Facility	Cost
Concrete Sidewalk (4" this, 5' wide)	\$189/linear foot
ADA Curb Ramp	\$4,745
LS Type Ladder Crosswalk (700ft Typical)	\$1,600
Pedestrian Signal	\$9,100

Table 2 City of Albany ADA Compliance Estimated Costs

Sidewalks/Trails Estimated Cost for Compliance (Obstructions Excluded):		
Partially Accessible (57,657.6 ft)*	\$	4,238,334.96
Not Accessible (22,279.8 ft)**	\$	5,446,136.16
Total Non-ADA Compliant Segments (245,552 ft)	\$	9,684,471.12
*Assumed 15% of panels in need of replacement **Assumed 30% of panels in need of replacement		
Curb Ramps and Signals Estimated Costs for Compliance:		
Curb Ramps*	\$	1,224,210.00
Pedestrian Signals**	\$	7,198,100.00
Total Intersections:	\$	8,422,310.00
*Excludes "Not Flush with Asphalt" **Does not include "No push button" signals		
Crosswalks Estimated Costs for Compliance:		
Total Crosswalks*		\$1,443,000
*Assumed incomplete access route is addressed in curb cut replacements		
Total Capital Investment	\$	19,549,781.12

Appendix D: Work Plan and Data Inventories

The City of Albany is committed to ensuring facilities in the public right of way are accessible for everyone, including people with disabilities. The City will prioritize:

- 1. facilities and intersections serving government, educational, healthcare, and commercial facilities; then*
- 2. facilities and intersections parks and historic sites; followed by*
- 3. facilities and intersections serving residential areas.*

The facilities that are prioritized first are most likely to be frequented by residents and visitors and are essential for the City's continued operation and success. Additionally, facilities and intersections in areas that had been designated "Hazardous" or "Definitely Declining" in the Home Owners' Loan Corporation's (HOLC) historic redlining maps will be prioritized first within each priority category to ensure the advancement of the City's equity agenda. A map of all sidewalk segments by priority ranking is in Appendix B.

The "Sidewalk Segments in Priority Areas" table within this appendix will be used to identify sidewalk segments eligible for repair/replacement based on their priority ranking. Sidewalk segments will then be cross referenced with field analysis results to determine specific barriers to accessibility and the repair/replacement needs for all facilities associated with the segment (a guide to using the field analysis results is included within this appendix). The City will then work to remove barriers to accessibility until each segment is brought to compliance, beginning with the highest priority (1A) and ending with the lowest priority (3A). For example: sidewalk segments ranked in priority category 1A will be the first to be repaired/replaced, followed by segments ranked in category 1B, and so on. The same process will be used to bring intersections, crossings, and transit stops to compliance using the corresponding tables within this appendix. Pedestrian signals will be addressed as the City determines it is appropriate to do so to avoid site disturbances due to electrical connection requirements.

The City may deviate from this framework take advantage of regular capital improvement projects or private development to upgrade deficient facilities, if occurring adjacent to those facilities. For example: a low priority segment that is rated "Not Accessible" may be brought to compliance in conjunction with an adjacent road resurfacing project before the City has finished bringing higher priority segments to compliance.

Sidewalk Segments in Priority Areas

Accessibility Rating	Road Name	Side of Road	From	To	Priority	Missing Panels	Heaving Panels	Too Narrow

Geodatabase Inventory

The City of Albany has received a data package with geodatabases that includes field evaluation results for sidewalks and trails, intersections, crossings, and transit stops. The following list is a guide outlining the data available in each geodatabase.

Sidewalks and Trails Geodatabase

- Segment location details
- Accessibility Rating (Fully Accessible --> Not Accessible)
- Presence of heaving panels, missing panels, obstructions, narrow segments.
- Sidewalk or trail material (concrete, asphalt, etc.)
- Facility photo
- Additional segment comments

Intersections Geodatabase

- Intersection location details
 - Curb Ramp evaluation:
 - presence of ramp, ramp material, ramp flush with road surface, ramp width
- Curb ramp photos
 - Detectable Warning Surface (DWS) evaluation:
 - presence of DWS, DWS type, DWS placement, DWS width/depth, DWS color, DWS deterioration
- DWS photos
 - Pedestrian Signal Evaluation:
 - Presence of pedestrian signal, presence of signal button, signal method (audio/visual), signal accessibility
- Pedestrian Signal Photos

Crossings Geodatabase

- Crossing location details
- Presence of pedestrian access route
- Pedestrian access route condition
- Deterioration type (if present)
- Presence of marked crosswalk
- Crosswalk material (paint, brick, etc.)
- Crosswalk condition
- Crossing photos

Transit Stop Geodatabase

- Transit stop location details
- Connectivity to sidewalk network
- Transit stop material
- Landing zone width/depth
- Transit stop photos

APPENDIX E: ADA Policy Statement

NOTICE UNDER THE AMERICANS WITH DISABILITIES ACT

In accordance with the requirements of title II of the Americans with Disabilities Act of 1990 ("ADA"), the City of Albany will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

Employment: the City of Albany does not discriminate on the basis of disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under title I of the ADA.

Effective Communication: the City of Albany will generally, upon request, provide appropriate aids and services leading to effective communication for qualified persons with disabilities so they can participate equally in the City of Albany's programs, services, and activities, including qualified sign language interpreters, documents in Braille, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

Modifications to Policies and Procedures: the City of Albany will make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services, and activities. For example, individuals with service animals are welcomed in the City of Albany offices, even where pets are generally prohibited.

Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service, or activity of the City of Albany, should contact the Chief Diversity Officer & ADA Coordinator/EEO Office, at Department of Administrative Services, City Hall, Room 307, 24 Eagle Street, Albany, New York 12207, 518-407-0255, as soon as possible but preferably no later than 48 hours before the scheduled event. Requests later than 48 hours, will be accommodated to the extent possible.

The ADA does not require the City of Albany to take any action that would fundamentally alter the nature of its programs or services, or impose an undue financial or administrative burden.

Complaints that a program, service, or activity of the City of Albany is not accessible to persons with disabilities should be directed to the Chief Diversity Officer & ADA Coordinator/EEO Office, at Department of Administrative Services, City Hall, Room 307, 24 Eagle Street, Albany, New York 12207, 518-407-0255.

The City of Albany will not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs

APPENDIX F: Grievance Procedure

City of Albany Grievance Procedure under the Americans with Disabilities Act

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the City of Albany. The City of Albany's Personnel Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or their designee as soon as possible but no later than 60 calendar days after the alleged violation to:

Chief Diversity Officer & ADA Coordinator/EEO Office
City of Albany
Department of Administrative Services
City Hall, Room 307
24 Eagle Street
Albany, NY 12207

Within 60 days after the filing of the complaint, an investigation shall be conducted and completed, including, if necessary, a meeting with the complainant to discuss the complaint and possible resolutions. No later than 60 days a determination shall be issued by the ADA Coordinator/EEO Office or their designee in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The determination will explain the position of the City of Albany and offer options for substantive resolution of the complaint.

If the determination by the ADA Coordinator/EEO Office or their designee does not satisfactorily resolve the issue, the complainant and/or his/her/their designee may appeal the decision within 30 calendar days after receipt of the response to the City's Commissioner of Administrative Services or her designee.

The City's Commissioner of Administrative Services or their designee will review the complaint and, if necessary, meet with the complainant to discuss the complaint and possible resolutions. Within 60 calendar days after receipt of the appeal, the City's Commissioner of Administrative Services or his/her designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the ADA Coordinator/EEO Office or their designee, appeals to the City's Commissioner of Administrative Services or their designee, and responses from these two offices will be retained by the City of Albany for at least three (3) years

APPENDIX G: ADA Coordinator

City of Albany ADA Coordinator

All complaints and/or questions regarding accessibility of any public buildings or pedestrian facilities within the right-of-way of the City of Albany should be directed to designated official below.

Title: Chief Equity Officer

Comments

Making sidewalks accessible for all is not only about making sure the pavement is flat and wide enough for all kinds of users, but also should include amenities like shade trees, benches, and trash cans. All three are lacking within the City of Albany and make the experience of walking unsafe and unpleasant. Thank you.

Comments

I note on the map on Page 38 of the Transition Plan that the Mount Hope Neighborhood (Mt. Hope Dr., Garland Ct., and Little Ln.) is completely missing, even though the color key chart includes a provision for "No sidewalk." Also, what is meant by "Other?" Portions of Southern Blvd. (Route 9W) and Mount Hope Dr. around Mount Hope Commons and the Sunoco station to the north of it do, indeed, have sidewalks. After all, Mount Hope Dr. is on CDTA Route 107.

Comments

Don't understand why the ADA transition plan only includes information about infrastructure and not information about other types of disability access such as hearing access, language access or access for neurodivergent individuals - contradicts pg. 3 that states the ADA plan "provides comprehensive civil rights protections to persons with disabilities in the areas of employment, state and local government services, and access to public accommodations, transportation, and telecommunications".

Comments

Thank you for drafting this transition plan. It is a document that is required by the Americans with Disabilities Act, but it is supposed to be a part of something else.

All state and local governments, their departments, and other entities within them are required to adopt transition plans by July 26, 1995. A transition plan is NOT about physical structures, features, or elements. It must identify any and all forms of discrimination in local laws, ordinances, rules, regulations, policies, services, offices, programs, activities, events, websites, announcements, and communications. It must prescribe remedies with deadlines for each one. Bear in mind that for anything that is found that is discriminatory in any way, the intent does not matter. The effect is what matters.

Governments, departments, and other entities with 50 or more employees also are required to adopt a second document called a self-evaluation of physical structures. THIS is a part of what you started with your 143-page draft that you are incorrectly calling your transition plan. You still must evaluate buildings owned and operated by Albany such as City Hall (which could use some major access improvements), 200 Henry Johnson Blvd., Bleecker Stadium, and any others.

Then you must write a REAL transition plan as the ADA mandates. It was due only 27 1/2 years ago. It costs nothing to fix bad policies. The Corporation Counsel and ADA Coordinator should schedule time together regularly to examine 400 years worth of policy and propose changes wherever necessary. There are passionate disabled advocates ready to advise you right here in this fair city. Call on us.
